TURKI ABDULLAH ALGHAMDI

Software Engineer | Backend Developer

Riyadh, Saudi Arabia | +966 54 993 1017 | kfupm.turki@gmail.com | linkedin.com/in/turki-abdullah-alghamdi | github.com/gTurki

SUMMARY

Backend Software Engineer specializing in Java and Spring Boot, building secure REST APIs with Spring Security, real-time systems and AI-integrated backends. Led a 5-member team to 3rd place in the Expo 2030 Riyadh Hackathon. Delivered multiple Spring Boot products integrating OpenAI, Gemini, Google Maps, Gmail SMTP, Telegram Bot and WhatsApp APIs. Brings Agile team leadership and CBP-PM certified project management to take products from requirements to working delivery.

EDUCATION

Bachelor of Science in Software Engineering **May 2026**
King Fahd University of Petroleum & Minerals (KFUPM) | Dhahran, Saudi Arabia

EXPERIENCE

Java Web Development Trainee – Immersive Bootcamp (300 Hours) **Aug 2026 – Oct 2026**
Tuwaiq Academy x Misk Foundation | Riyadh, Saudi Arabia

- Completed a 300-hour intensive bootcamp in Java backend engineering and AI integration, delivering 5 Spring Boot REST API projects including 3 capstones.
- Served as Team Leader for two full-stack projects, running Agile sprint planning, task distribution and code integration.
- Progressed from CRUD APIs to production-style systems: third-party API integration, JWT security, real-time WebSockets, concurrency control, AI fallbacks and Docker deployment.

PROJECTS

Atahad – AI Commitment & Accountability App | Backend & Frontend Developer **November 2026**
Tuwaiq Academy x Misk Foundation

- Co-Built a commitment-contract app that uses loss aversion to build habits: users stake money on weekly goals, and every missed commitment becomes a donation to Ehsan.
- Made accountability enforceable with AI-verified proofs (photo challenge, focus timer, quiz, GPS geofence, step count), an app lock until owed donations are proven, and group commitments with shared penalties; built by a 4-person team in Spring Boot and Flutter (193 endpoints).

Technologies: Java, Spring Boot, Spring Security, JPA/Hibernate, MySQL, Flutter/Dart, Gemini API, OpenRouter API, Google Calendar API, Google Places API, Open Library API, n8n, Gmail IMAP, WhatsApp, Git/GitHub, Postman

Rifd – AI Operations Center for Expo 2030 | Team Leader & Backend Developer **October 2026**
Expo 2030 Riyadh Hackathon - Tuwaiq Academy x Misk Foundation

- Led a 5-person team to 3rd place by building an operations center that unifies alerts from 7 sources into a live dashboard, consolidating a 40-alert demo burst into 3 actionable incidents.
- Built the complete backend (18 entities, 70 endpoints) and integrated AI models to classify severity, merge duplicate alerts and detect fire/smoke in photos, plus Gemini voice transcription.
- Automated response with playbook suggestions, nearest-staff assignment and task escalation; real-time WebSocket updates, JWT role-based security and Docker deployment on Railway.

Technologies: Java/Spring Boot stack (JPA, MySQL) + Spring Security (JWT), WebSocket (STOMP), Telegram Bot API, Hugging Face AI models, Docker, Railway, Gemini API (voice), Google Maps API, Brevo (Email), WhatsApp, Git/GitHub

Ejad – AI Lost & Found Platform | Team Leader & Backend Developer **September 2026**
Tuwaiq Academy x Misk Foundation

- Built the backend (8 entities, 103 endpoints) with an AI matching engine that scores similarity between lost and found reports and auto-notifies owners of matches above 70% via in-app, email and WhatsApp.
- Implemented image-based reporting where AI extracts title, color, brand and category from a photo, plus geocoded radius search for nearby items and locations.

Technologies: Java, Spring Boot, Spring Data JPA/Hibernate, MySQL, React, React Router, OpenAI API, Gemini API, Google Maps API, Gmail SMTP, WhatsApp, Git/GitHub

SKILLS

- **Technical:** Java, Spring Boot, Spring Security, JPA/Hibernate, REST APIs, WebSocket, MySQL, JUnit, Docker, n8n, Git/GitHub, Flutter/Dart, React, Python, Flask, C++ (OOP), API Integration (OpenAI, Gemini, Telegram, Gmail, WhatsApp, Google Maps)
- **Project & Delivery:** Project Management (CBP-PM), Agile/Scrum, SDLC, Requirements Gathering, Risk Assessment, Team Leadership, Technical Reporting
- **Languages:** English (Proficient), Arabic (Native)

CERTIFICATIONS

- Web Development using Java & Integrating AI Technologies Bootcamp (300 hours) – Tuwaiq Academy x Misk
- Professional Accreditation – Software Engineer – Saudi Council of Engineers (SCE)
- Certified Business Professional in Project Management (CBP-PM) – IBTA
- Cisco Certified Network Associate (CCNA) Routing and Switching – Cisco
- Software Engineering Summer Training – United Cement Industrial Company (200 hours)
